

Nic Mansfield

Senior Operations, SRE & Infrastructure Leader

(801) 369-1502 • zuubux@gmail.com • South Jordan, Utah (Salt Lake City, Metropolitan Area)

Summary

High-impact infrastructure leader with **over 20 years of experience** driving reliability and scale across enterprise SaaS environments. Expert in establishing “Golden Path” engineering workflows, implementing **practical AI automation**, and executing frictionless **multi-billion-dollar infrastructure integrations**. Proven track record of **doubling operational capacity** through **blameless** reliability culture and **standardization**, delivering elite system **stability** without team burnout.

Professional Experience

Senior Cloud Operations Manager • Broadcom

Salt Lake City, UT • Nov 2019 - Jan 2026

- Developed and executed a global operational readiness strategy to standardize legacy remediation procedures into machine-readable Markdown (.md), priming the data for enterprise LLM (Vertex AI) integration and automated incident resolution.
- Orchestrated a massive portfolio-wide audit of infrastructure runbooks, leveraging flow orchestration and Ansible to safely transition manual remediation tasks into automated, self-healing workflows.
- Led global SRE strategy for a \$20B portfolio, integrating multi-billion dollar acquisitions into a standardized infrastructure platform in months rather than years – enhancing consistency, reliability and lowering operating expenses.
- Engineered & executed the rapid, high-stakes migration of 40 data centers, 4,000 VMs and 500+ ESX hosts to GCP in under 6 months, completing the initiative ahead of schedule.
- Built & designed the governance and technical review for On-Prem to Public Cloud Migration (GCP/AWS) strategies, focusing on CI/CD, Disaster Recovery, and Synthetic Monitoring.
- Established global Operational Readiness Reviews (ORRs) and standards for authentication, vulnerability patching, and change management for all new SaaS Offerings.

Senior SaaS Operations Manager • Symantec

Salt Lake City, UT • May 2016 - Nov 2019

- Oversaw Infrastructure, SRE, and Network teams for the globally distributed Symantec 'Web Security Service (WSS)' cloud platform, managing 40+ data centers and 4,000+ VMs.
- Achieved and sustained 99.999% SLAs across physical and virtual infrastructure, guaranteeing service delivery for mission-critical enterprise clients.

- Directed M&A integration efforts by optimizing team responsibilities following the Symantec / Blue Coat acquisition, ensuring zero operational downtime.
- Designed and implemented a complex Python and Salt-based continuous deployment (CD) pipeline, reducing deployment and validation times by an estimated 80%.
- Executed highly complex, simultaneous capacity expansion projects globally, driving a 40% infrastructure scale-up within a six-month period to support rapid service growth.

Senior Linux Systems Lead / Infrastructure Architect • Blue Coat Systems

Salt Lake City, UT • Oct 2010 - May 2016

- Maintained a highly complex cloud infrastructure of 3,500+ virtual servers across 40 global data centers for the high-volume Webpulse network.
- Served as the primary engineering escalation point, rapidly resolving highly visible, complex outages to minimize platform downtime.
- Championed continuous compliance and infrastructure auditing to maintain strict requirements for ISO 27001 and SSAE16 security certifications.

Early Career Technical Leadership

Salt Lake City Metro Area • 2006 – 2010

- **Information Technology Director • Aculis:** Managed \$200k+ IT budgets, authored comprehensive security policies, and oversaw a hybrid environment of 200+ Linux and Windows servers.
- **IT Manager • Circlepix:** Led physical data center design and build-out initiatives; managed hybrid VoIP systems and multi-node server architectures.

Technical Skills & Expertise

- **Operations & SRE Leadership:** Multi-Billion Dollar M&A Integration, Infrastructure Governance, Operational Readiness Reviews (ORR), Disaster Recovery (DR), SLA/SLO & Error Budgets, Toil Reduction, Major Incident Management, Blameless Post-Mortems, Black Box Thinking, ITIL, Continuous Improvement, Vendor & Budget Management.
- **Cloud & Infrastructure:** Hybrid Cloud, Google Cloud Platform (GCP), Amazon Web Services (AWS), VMware (ESXi/vSphere), Kubernetes (K8s), On-Prem.
- **Automation & Observability:** Infrastructure as Code (IaC), Terraform, Configuration Management (Salt, Ansible, Chef), CI/CD Pipelines, Splunk, Grafana, Observability, LLMOps
- **Systems & SaaS Governance:** Practical AI/LLM Infrastructure Architecture, Google Workspace, SaaS Portfolio Optimization, Identity & Access Management (IAM), Asset Management, FinOps, Linux (RHEL/Ubuntu).

Education

Bachelor of Science - Information Systems

Utah Valley University, Orem, UT • 2001 - 2005
